**Disclaimer**

This book has been compiled for use as a free educational resource for pipers and other musicians. Most of the tunes contained within are older traditional tunes, some with origins lost in the mists of time. We have sought to attribute tunes to their original composers where possible and have included their details within the tune histories where we have been able to source them. If we have missed out an attribution that should be there, we will ensure that all future editions of the book will correct this oversight. All copyright remains with the composers.

The melodies in this collection have been arranged primarily for the Scottish Smallpipes which usually have a nine-note range. In some of the tunes, particularly those in the key of A Minor, pipers can apply tape to their chanters to play F and C naturals if the music so dictates. Many of the tunes listed in the key of A Major may actually be in the key of A Mixolydian when played on the smallpipes, with G naturals rather than G sharps. This is something for accompanying musicians on other instruments to keep in mind.

The guitar chords provided are only suggested as a starting point and are in no way definitive.

When accompanying Highland bagpipes rather than smallpipes, guitarists should apply a Capo at the first fret.

## Foreword from Department of Foreign Affairs

---

Musicians from both north and south are some of the best known in the world today and indeed music remains one of the most tangible and vibrant forms of culture practiced on the island of Ireland. The harps which feature on the coats of arms of both Ireland and the United Kingdom speak to how central music has always been to identity and culture on this island, a part of everyday life which is shared across communities and traditions.

The Ulster-Scots tradition, a product of a historical and ongoing relationship with Scotland, is an integral part of a rich cultural inheritance in which we all share. Musicians from both the Ulster-Scots and Irish traditions have long dipped into an often common repertoire of music and melodies of diverse origins, keeping alive and building upon the traditions which have been handed down to them. The Department of Foreign Affairs is delighted to have the opportunity to support initiatives like this through its Reconciliation Fund and we congratulate the Ulster-Scots Community Network and everyone involved for bringing it to fruition.

We hope that this book is enjoyed by musicians and listeners alike from all backgrounds to ensure that Ulster-Scots and Irish traditional music remain a vibrant and influential part of the musical life that is such an important part of the diverse culture of our island.

## Foreword from Ulster-Scots Community Network

---

Most, if not all, communities have music and musical traditions that help to provide a sense of identity to them. Music plays an intrinsic role in celebration and sharing of cultural traditions and this project aimed to highlight the reality that many of the tunes used within different musical traditions within these islands are closer and more shared than is often realised. Researching the histories of the tunes showed us that tunes appear in many forms across generations, with names changing along the way. What the project showed us more than anything else is that many of the tunes whatever their origins are now firmly held as part of the collective memory of people here.

The intention of the project has been simple. From the start we wanted to collect a range of tunes used by musicians from across musical traditions and present them in such a way that the end result would be a resource that musicians of all abilities could use to play music together. We hope this publication is something that musicians will find useful in future years, and we hope that the musicians who visit us to take part in our traditional Ulster-Scots music sessions find it helpful. We want to thank the musicians who helped to identify the tunes to be used, played them through and decided whether they worked as a cohesive whole – Andy McGregor, Grahame Harris and Matthew Warwick. Thanks also to Alan McCormick for all his work around the history of the tunes.

Ultimate thanks however rest with the Department of Foreign Affairs for their financial support – without which the project would have remained firmly on the drawing board.

He passed away in 2017.

The tune was composed by PM John MacLellan during WWI and reflected the fact that Flanders witnessed some of the bloodiest battles of the conflict. John MacLellan was born in Dunoon in 1875 and served with the Highland Light Infantry in the Boer War, where he was awarded the Distinguished Conduct Medal. Composed by PM John MacLellan who served with the Highland Light Infantry, he saw action in the Second Boer War and was awarded the Distinguished Conduct Medal for gallantry. The tune marks the battle at Magersfontein in 1899 in which the Highland Division suffered heavy casualties. This tune was one of many that MacLellan composed and his work has featured in many pipe tune compilations over the years. He was remembered as a shy and quiet individual who as well as being an outstanding composer of bagpipe music, also wrote songs and poetry and was a talented painter too. He died suddenly in 1949 and was buried with full military honours.

He managed to escape on the march to Germany and upon his return home he re-enlisted with the 7th Seaforth Highlanders and went back to France with them and piped them across the Rhine. He was awarded an MBE in 1978.

This tune, also known as *Bonaparte Crossing the Rhine*, is one whose origins are lost in the mists of time. Originally written as a Strathspey or Scottish-Snap. *Cutting Bracken* tells the story of a broken-hearted fairy or sithe, who fell in love with a young lass while she was cutting ferns or bracken that would have been used to bed animals or thatch roofs. When her family learned of the relationship with the fairy, and feared for her safety, they kept her at home and would not let her return to cutting bracken.

Composed by PM Donald MacLeod. Flotta is a place-name from Orkney. The title references Flett who was a Highland Piper in the Seaforth Highlanders, along with the tune's composer, Donald MacLeod. A story tells that MacLeod and another piper had guard duty on a train, protecting the regimental silver as it was being transported to some function in London. To pass the time, they brought out their chanter and began to play, when MacLeod suggested they compose a tune together. They came up with this march, and cast about for a title. A former coal miner, he became one of the highest earning performers in the English speaking world prior to the outbreak of WWI and was the first British entertainer to sell a million records. He was heavily involved in the war effort, raising funds and entertaining troops. He performed just days after learning of the death of his son on the Western Front. Knighted in 1919 he passed away peacefully in 1950.

An Irish patriotic song written by Thomas Moore who set it to the melody of *The Moreen*, an old Irish air. It is widely believed that Moore composed the song in remembrance of several of his friends, whom he met while studying at Trinity College, Dublin who were killed during the United Irish Uprising of 1798. However, this has never been definitively proved and the tune is also played by the British Army and other marching bands. The song gained widespread popularity and became a favorite of many Irishmen who fought during the American Civil War and gained even more popularity after WWI.

This tune was composed by James Scott Skinner born in Aberdeenshire and regarded as one of the most influential fiddlers in Scottish music and known as the Strathspey King. He was taught the fiddle by his elder brother and he started playing at local dances before undertaking a six-year apprenticeship with a touring orchestra. He trained as a dancing master and eventually was invited to teach dancing to the Royal Household at Balmoral Castle. He was widely regarded as a musical genius. He struggled to make ends meet financially despite featuring in many of the earliest recordings of Scottish music. He died in 1927 and friends and admirers raised a subscription for a marble memorial at his graveside which was unveiled by Sir Harry Lauder.

Luke Donnellan from County Armagh transcribed 300 traditional dance tunes that were mainly reels, hornpipes and marches collected in the south Armagh area, many of which originated from Scottish dance music. He played the fiddle and highland bagpipes. This tune is found in a collection called *Oriel Songs and Dances* which was first published in 1909. The possible origin of the title comes from the Plaisance Garden created in Kelburn Castle Estate, Ayrshire in the 18th Century, home of 1000-year-old Yew trees.

It is a standard of folk sessions in many parts of the world as well as a tune that many school children are taught.

Written by Pipe Major Robert Matheson of Shotts. This was the first tune played on his solo album, entitled *The Big Birl*, released in 1997 which features him playing smallpipes on some of the tracks. Robert is a prolific composer and was one of the first to embrace the collaboration of pipes with a wide variety of instruments in his recordings.

This tune was originally a poem about a love affair which was not to be, between the poet Patrick Kavanagh and Dr Hilda Moriarty. When the poem was written, Hilda was staying on the Raglan Road in Dublin and Kavanagh saw her coming and going to the University. He asked her to critique his work as an excuse to spend time with her and told her that he would immortalise her in poetry. The poem was put to music by Luke Kelly of the Dubliners after he and Kavanagh met in a Dublin pub called *The Bailey*. It was set to the music of *The Dawning of the Day* which was originally an Irish song called *Fáinne Geal an Lae*.

Composed by Gordon Duncan, the story behind this beautiful air is that while at *Festival Interceltique de Lorient*, Gordon had a few drams and fell asleep in a bar. When he awoke the air of *The Sleeping Tune* was in his head. Gordon wasn't sure if he had heard it played while asleep and often asked if anyone knew the composer. No one ever came forward.
